Fig. 3: Removing old CPU-firmware

- Insert the new firmware into the CPU board.
- Switch on the chiller via the large red main switch (door must be closed).
- Wait approx. 20 sec. and turn the chiller again OFF.
- Switch on the chiller again via the large red main switch (door must be closed).
- Check the Simatic operational panel OP7 (Fig. 2) for any error messages. In case of an error message, press the black reset button below the large red main switch and press

the yellow button (ACK) at the operational panel OP7. The error messages should now be cleared and the chiller will start after some seconds.

- Use a permanent marker and add revision level 02 on the inside of the right chiller door (Fig. 4).
